

## Map the System MRU Campus Lead

# Nicole Darnayla

Nicole will serve as the primary coordinator for MRU's participation in this innovative challenge focused on systems thinking. Nicole will facilitate a vibrant campus environment that encourages students from diverse disciplines to engage with complex societal issues through systems thinking. Through this role, she aims to cultivate a community of system thinkers and problem-solvers who are equipped to address the complex challenges facing our world today.

As a previous participant who loved the opportunity that Map the System has provided her, she hopes to spark the same passion in other students. Along with her group, Nicole honed a top 5 spot for the campus final where her group discussed Mental Health Perceptions in Southeast Asia. As a psychology student, Nicole has really appreciated systems thinking as it provides her with a new perspective both in her studies, and in her everyday life.
